The World Police Summit Conference is the world’s leading conversation for police and security experts—an inspiring opportunity to promote better policing and explore, discover, and share the latest developments.

Hosting six distinct conferences—covering the strategic and technical disciplines—each conference features high-level sessions across multiple tracks that are vital to policing and law enforcement agencies—from cybercrime to forensic science and beyond.

The conference gives delegates from around the world the chance to learn best practices from the front line and meet the sector leaders shaping next-generation policing.
WORLD POLICE SUMMIT CONFERENCES

CRIME PREVENTION
The World Police Summit’s Crime Prevention Conference will provide a high-level platform to examine the immediate priorities facing police forces and law enforcement agencies in the wake of shifting crime forms, the availability and access to sophisticated technologies, and altering criminal motives.

Convening international police chiefs, government leaders, policymakers, and influencers from the entire policing and law enforcement spectrum, the conference will facilitate the development of future-ready strategies to enhance public safety and security in the communities they operate in and foster partnerships to thwart cross-border crimes.

FORENSICS SCIENCES
Revolutionary scientific practices are critical to the progress of a multitude of industries. As a prime pillar of the crime prevention and justice systems that relies on science and research, forensic teams are a crucial component of the law enforcement value chain supporting the timely identification of criminals and their motives.

Featuring strategic and technical sessions, the Forensic science conference will gather international experts, scientists, and researchers to underline the latest scientific and technical advances in forensics that are catalysing crime scene investigation, evidence analysis, criminal identification, and prosecution.

ANTI-NARCOTICS
The world is experiencing a rise in the use of drugs and psychotropic substances triggering an increase in novel supply markets to meet the burgeoning demand. As new avenues of drug trafficking emerge, police forces and law enforcement agencies have begun collaborating to thwart the supply chain channels. Additionally, governments and public health agencies must equally remain cautious and work with law enforcement agencies in educating communities on the ill effects of drugs to nurture an addiction-immune generation.

The Anti-narcotics conference will feature high-level dialogues that will shed light on the intricacies of drug trade across economies and examine forward-looking programmes to augment community awareness of the ill effects of psychotropic substances, counter addiction, and support rehabilitation.

POLICE INNOVATION & RESILIENCE
Novel crime forms, shifting societal dynamics, and security threats have made police forces revisit their operational directives and prepare their forces to stay ahead of criminals. Intense traumatic crime scenes also impact the overall physical and mental well-being of officers enabling them to face future challenging situations.

Covering pressing issues that will drive the sector in the coming years, the Police Innovation & Resilience Conference will convene senior police leaders, transport safety officials, and security experts to underline the role of innovation in policing and lay the foundation for enhancing organisational resilience, officer wellbeing, and creating equitable and diverse global police forces.

DRONES
The changing criminal landscape has redefined the roles and responsibilities of police forces as well as the pace of technology adoption. The availability of drones and their impressive payloads are supporting police forces across an array of tasks ranging from front-line operations to surveillance missions.

The World Police Summit’s Drones Conference serves as the prime platform for police forces and law enforcement agencies to discuss and fathom the latest advances in unmanned aerial systems that cater to a multitude of police operations ranging from emergency missions to crime scene investigations.

K9
As a crucial pillar of the policing ecosystem, K9 teams have become indispensable units for police forces saving them several operational man-hours and driving faster identification of trafficked goods, psychotropic substances, and criminals. Thanks to their impressive olfactory capabilities, they serve on a myriad of critical missions supporting police forces to take down suspects whilst protecting officers from harm.

Gathering international canine experts, the K9 Conference is a unique platform for senior experts from police forces to explore and demonstrate proven training and canine handling strategies to support law enforcement officers and gain insights into the latest technologies that can augment K9 training programmes, enhance their olfactory senses and drive the proper breeding of canines for police operations.
2023 SPEAKERS

JÜRGEN STOCK
Secretary General
INTERPOL

TUESDAY 7 MARCH 2023

PLENARY SESSIONS

10.00 - 10.45  Opening keynote | Theatre 1 & 2
Evolving global policing styles and approaches to prevent crime and deliver justice

In the pursuit of crime prevention, police officers have begun witnessing a rapid influx of technology deployment across their forces. Whilst technology does play a crucial role in mitigating evolving crime forms, the generational perception of crime is shifting the very fundamentals of public safety forcing leaders to revisit their policing models. How can police forces adopt novel frameworks to address intergenerational conflict within their forces? How will this impact the community relations of the forces?

Attendee Insights:
This session underlines the importance of modernising the approaches to prevent crime through new leadership styles and strategies that encompass force integrity, technology, and community trust.

10.45 - 11.30  Leadership Keynote | Commissioners session | Theatre 1

Brenda Lucki
Commissioner, Royal Canadian Mounted Police

Keechant L. Sewell,
Police Commissioner, New York Police Department

Andrew Coster
Commissioner and Chief Executive New Zealand Police

HE Hamid AlZaabi
Director General
Executive Office of Anti-Money Laundering and Counter-terrorism Financing

Mr. Jürgen Stock
Secretary General INTERPOL

Mr. Jürgen Stock
Secretary General INTERPOL
### TUESDAY 7 MARCH 2022

### CRIME PREVENTION CONFERENCE

**CRIME AND CRIMINAL JUSTICE TRACK**

<table>
<thead>
<tr>
<th>Time</th>
<th>Session</th>
</tr>
</thead>
</table>
| 11:30 - 12.10 | **Leadership panel | Strategic session | Theatre 1 & 2**  
**Challenges facing the crime detection and prevention systems: a road map for the future**  
Cohesive approaches are essential for police forces and law enforcement agencies to navigate today’s crime landscape. Though traditional crime prevention practices, such as opportunity reduction, still prove to be useful, novel technologies have catalysed the crime prevention and prediction capabilities of police forces. What are the significant barriers to technology adoption amongst police forces today? How are police leaders acknowledging the societal challenges and how are they harnessing international partnership models and cross-agency data sharing to aid crime prevention?  
**Attendee Insights:**  
An important session for attendees to understand the key trends around crime prevention systems and to gain insights into how police forces are responding to changing crime patterns.

| 12.30 – 13.10 | **Leadership panel | Strategic session | Theatre 1 & 2**  
**Policing future societies: holistic governance mechanisms to counter evolving urban crime, violent extremism, hate crime, and discrimination**  
The shifting population dynamics coupled with income inequality, substance abuse, and gang violence have heightened the crime levels in urban economies. To counter such crime forms, police forces in developed societies have begun adopting a more localised approach across high, medium, and low-income economies. With diverse societies developing across the globe, what strategies can police forces implement to enhance collaboration with government officials and civic society to counter extremism and hate towards ethnic communities? What is the role of environmental design and community-oriented policing in mitigating changing urban crime forms?  
**Attendee Insights:**  
A must-attend session to understand the strategies adopted by leading police forces to counter urban crime through various crime control strategies and assess the efficiency of such programmes across urban economies.

| 13.10 – 14.00 | Lunch |

| 14.00 – 14.20 | **Leadership interview | Strategic session | Theatre 1 & 2**  
**Intentional deception in the digital age: national frameworks to tackle new forms of fraud**  
Fraud crimes range in complexity and damage and have been growing rapidly demanding an urgent response from government agencies, police forces, and the public. The reliance on digital technologies to execute fraud has made it challenging to pursue and prosecute criminals. What novel approaches can government agencies and police forces implement to enable them to take preventive actions? How are government agencies disseminating the assessed fraud reports to local police forces for investigation? And what legislative amendments are needed to prosecute fraudsters in the digital age?  
**Attendee Insights:**  
An important session that underscores how governments and police forces can enhance institutional partnerships and develop deterrent counter-fraud frameworks.
14.20 – 15.00  
**Leadership panel | Strategic session | Theatre 1 & 2**

**Strengthening societal partnerships: the fading boundaries of constitutional and community policing**

Constitutional policing works within the parameters of the day-to-day routines of policing as defined in the constitution. Whilst it is a necessity, adopting constitutional policing as a standalone model is not sufficient to prevent the new crime forms prevalent today; involving the communities in mutually identifying the policing and crime prevention strategies is crucial. Despite having a baseline standard, community policing strategies often vary depending on the needs of the communities included. How can police forces and communities take a unified approach to prevent crime and violence? How are police leaders directing their officers to fortify community relationships?

**Attendee Insights:**
An important session for those seeking to understand how community policing is being adopted across various police forces to safeguard the welfare of communities and facilitate a fundamental shift in the way police operate, prevent, and predict crime with help from the community.

15.00 – 15.20  
**Keynote | Strategic session | Theatre 1**

Mr. James H. Smith III  
Special Agent in Charge Federal Bureau of Investigation

15.00 – 15.30  
**Technical sessions**

15:20 – 15:35 – Presentation 1  
15:35 – 15:50 – Presentation 22
TUESDAY 7 MARCH 2023

DRONES CONFERENCE

11:30 – 11:50
Keynote | Strategic session | Theatre 3
Challenges and Threats of C-UAS in an Urban Environment

11:50 – 12:30
Leadership panel | Strategic session | Theatre 3
Leveraging UAS in the fight against crime: considerations for police and law enforcement agencies to bolster drone capabilities

Drones have become critical assets for law enforcement and policing agencies supplying them with situational awareness of emergency situations, collecting ground evidence, and conducting surveillance, all tied to the vast amount of public data that they generate. How are police forces leveraging next-generation UAVs and allied technologies to respond to such situations without compromising or violating the privacy of citizens? With more drones being deployed these days, does it come at the cost of diminishing public trust in police? How are police forces and law enforcement agencies augmenting their drone capabilities through training?

Attendee Insights:
This session will shed light on the latest advances in drone technologies and the various strategies adopted by police forces and law enforcement agencies to augment their drone competencies to enhance public safety without compromising on public trust.

Sponsored By

Sami Hätönen, Superintendent and Expert, Operational Commanding and Unmanned Aviation, Police University College, Finland
Saeed Alzhrani - CTO & Co-Founder, SRB Aerial Systems
Jan Otto Johansen - Head of C-UAS, Norwegian National Police

12:30 – 12:45
Leadership Keynote | Technical session | Theatre 3
Case Study the Drone wars- Police Drones vs. Drug-cartels’ drones in Mexico by Rabdan Academy

12:45 – 13:00
Leadership Keynote | Technical session | Theatre 3
UAS Program Acceptance and Avoiding Ethical Landmines

13.00 – 14.00
Lunch

14.00 – 14.20
Leadership Keynote | Strategic session | Theatre 3
Red Teaming the FIFA World Cup 2022

Brooke Tapsall
Founder and CEO
DroneALERT

14:20 – 15:00
Leadership panel | Strategic session | Theatre 3
Drone Integration: Current Trends & Where We’re Going

Eszter Kovács
Founder
DroneTalks
Ricky Sandhu
Founder
Urban Air-Port
**TUESDAY 7 MARCH 2023**

**POLICE INNOVATION & RESILIENCE CONFERENCE**

**TRANSPORT SAFETY TRACK**

**11:30 – 12:15**

**Leadership panel | Strategic session | Theatre 4**

*Enhancing traffic enforcement in the age of autonomous vehicles*

Self-driving cars have the potential to lessen the need for traffic enforcement by police forces. Autonomous vehicle technology focuses on the broader aspects of road safety and adherence to traffic laws but pays little heed to the interaction between police officers and autonomous vehicles and the general safety of officers during such interactions. What standard procedures are required to ease such communications? How can public-private partnerships and novel communication models enhance interaction between law enforcement, OEMs, and autonomous vehicle operators?

**Attendee Insights:**
A high-level session that sheds light on the advances in autonomous driving technologies and their implications on traffic enforcement, road safety, and de-escalation.

**12:20 – 12:35**

**Keynote | Strategic session | Theatre 4**

*Vision Zero 2025: leveraging data analytics and community programmes to improve road safety*

Introduced in the 1990s, vision zero has evolved over the years to become an important pillar of global road safety. With the plethora of technologies available at their disposal to monitor traffic, how are traffic enforcement agencies leveraging quality data and analytics to track the progress of Vision Zero programmes? How can this data be used to make informed traffic decisions and assess the safety parameters when walking, driving, or using public transport? How can the police work with communities and enhance traffic awareness?

**Attendee Insights:**
This session underlines how global police forces and traffic enforcement agencies are making use of data and analytics to minimize road accidents and enhance the safety of road users.

**12:40 – 13:30**

**Leadership panel | Strategic session | Theatre 4**

*The road ahead: Advances in traffic safety assessments, governance, and risk management*

Future-ready road safety and governance mechanisms are crucial to minimising risks and preventing road accidents. Evidence-based approaches to enhance road safety have taken the centre stage amongst global authorities to enable safer interactions between vehicles, pedestrians, cyclists, and other road users. How can government, traffic enforcement agencies, and the police work together to assess the prevailing road safety programmes, such as Vision Zero, and augment them to bring about a substantial reduction in the number of road accidents and save lives?

**Attendee Insights:**
An important panel that underscores the importance of developing forward-looking road safety programmes and governance mechanisms to increase awareness and support the collective cause of minimising road accidents.

**13:30 – 14:30**

**Lunch**
Leveraging partnerships to enhance road safety awareness in future societies

Distractions caused by personal issues, lack of attention and several other factors often influence the behaviour of road users. With the multitude of transportation modes available today, it has become crucial for traffic enforcement agencies to work with communities and road users through curated training and awareness programmes to reduce mishaps and abide by traffic laws. How are traffic enforcement agencies leveraging such partnerships to enhance the behaviour of road users? What strategies can the police and traffic safety agencies adopt to work with the private sector to train their staff on safe driving and equip their riders with the right tools and mindset to influence safe driving?

Attendee Insights:
This session will shed light on the importance of public-private partnerships in road safety, which, when properly implemented, will minimise road accidents and improve traffic flow.

Technical sessions | Theatre 4

15:05 - 15:20 - Presentation 1
15:20 - 15:35 - Presentation 2
15:35 - 15:50 - Presentation 3
Tuesday 7 March 2023

Forensic Science Conference

11:30 – 11:45
Keynote | Strategic session | Theatre 5
Youth Empowerment in Forensic Sciences

Attendee Insights:
A key session that highlights the significance of framing future-ready standardisation practices for forensics teams across global police forces to aid with faster criminal identification.

Captain Abdulla Albastaki
Forensic Biologist
Dubai Police HQ

11:50 – 12:05
Leadership panel | Strategic session | Theatre 5
Future of forensics: adopting forensic data integration and analytics for faster criminal identification

Every action at a crime scene leaves a reflection and this has helped forensic teams track down criminals and identify their motives. Advances in computing and electronic technologies have also helped forensic teams use complex computational models and algorithms to identify traces. As more digital solutions become available, how are forensic teams making the best use of such technologies? How can police forces avoid duplication and disintegration by collating and storing forensic data in centralised digital repositories?

Attendee Insights:
This panel will shed light on the importance of leveraging next-generation data integration technologies to overcome fragmentation across global forensic teams.

12:00 – 13:00
Leadership panel | Strategic session | Theatre 5
Strategic Planning for Forensic Science Laboratories

Forensics is a complex science. With criminals using new approaches to committing crimes, it’s vital that forensic teams remain equipped with the necessary skillsets to track down criminals. How are forensic teams addressing the skill shortage? What policy changes and recommendations are required to encourage more students to pursue forensic sciences? How can academia bridge the talent gap across global forensic teams?

Attendee Insights:
An important panel that sheds light on the strategies adopted by various forensic units to augment their technical skillsets through a mix of novel hiring programmes, training methodologies and advanced technologies.

13:00 – 14:00
Lunch

14:00 – 14:40
Leadership panel | Strategic session | Theatre 5
Nurturing Competent Forensic Teams: Enhancing forensic research and development skillsets amongst law enforcement agencies

Lt. Col. Dr. Rashid Alghafri
Director of International Center for Forensic Science
Dubai Police
TUESDAY 7 MARCH 2023

ANTI-NARCOTICS WORKSHOP

10.00 – 11.00  Workshop - 1
The international cooperation role to reduce narcotic substances smuggling and trafficking

11.30 – 12.30 Workshop - 2
Skills of dealing with drug abusers and proactive detection

TUESDAY 7 MARCH 2023

EXPERTS HUB

10.00 – 10.30  Keynote | Strategic session
Gene Hacking

10.30 – 11.00  Keynote | Strategic session
Gene Hacking

11.30 – 12.00  Keynote | Strategic session
Soil Forensics

Prof Lorna Dawson
Head of Forensic Science
The James Hutton Institute

13.30 – 14.00  Keynote | Strategic session
Forensics Sciences through Technologies

Prof Niamh Nic Daeid
Director of Leverhulme Research Centre for Forensic Science,
University of Dundee
CRIME PREVENTION CONFERENCE
CYBERCRIME TRACK

09:00 – 09:20a  Leadership interview | Strategic session | Theatre 1
Global cybercrime outlook 2023: challenges facing law enforcement and police forces

Cybercrime has become a globally disruptive activity, causing trillions of dollars in financial losses across economies and forcing countries to declare cybersecurity as a national priority. Whilst national cyber security falls under the purview of government bodies, it is crucial to coordinate with the public and private sectors, academia, and civil society for recommendations. During the pandemic, cybercriminals exploited remote working technologies to target their attacks on businesses, which is further accentuated by the growing crime-as-a-service market on the dark web. What does the future of cybersecurity look like and how can police, law enforcement agencies, and national cybersecurity authorities bolster their capabilities to defend their cyberspace?

Attendee Insights:
Gain insights into the future of cybercrime and the role of law enforcement in developing forward-looking policies, and strategies to counter next-generation cybercrime.

Sir Rob Wainwright
Partner
Deloitte

09.20 – 10.00  Leadership panel | Strategic session | Theatre 1
Enhancing cyber coordination in the fight against digital crime and bolstering children’s online protection

A vast amount of digital data is at the fingertips of global police forces. But how it is being used matters the most. Combined with geographic information and deep-learning frameworks, how are datasets being used to predict hidden crime patterns, from robbery to preventing child sexual abuse and trafficking? How is the private sector opening new avenues for law enforcement agencies to work together on the common cause of protecting children in the digital space?

Attendee Insights:
A key session for attendees from the global law enforcement sector to learn how technological advances are helping police forces solve and prevent complex criminal cases relating to child abuse whilst also ensuring the safety of children online.

Cyril Gout
Director of Operational Support and Analysis
INTERPOL

10.00 – 10.20  Leadership interview | Strategic session | Theatre 1
Eliminating digital fragmentation: inclusive cybersecurity strategies and partnership frameworks to mitigate evolving crime forms

As one of the most prolific forms of transnational crime, cybercrime has brought new challenges for police forces and law enforcement agencies around the world. Knowledge exchange, training, and information-sharing related to cybercrime are critical to support law enforcement with operational information to locate evidence and suspects across multiple jurisdictions. In the face of the continued evolution of cyber threats on a global scale, how can police forces and law enforcement agencies foster inter-agency cooperation? What strategies are being adopted to overcome the underreporting challenges of cybercrime?

Attendee Insights:
Gain insights into how police forces and law enforcement agencies are leveraging partnerships and advanced cyber information-sharing platforms to assess threats and identify cybercriminals.

Craig Jones
Director Cybercrime
INTERPOL

Uncovering hidden assets: evolving financial intelligence and compliance frameworks for law enforcement agencies

The scale and repercussions of financial crime are becoming serious. Timely identification and reporting of key financial transactions that are tied to a terrorist or criminal group information to law enforcement play a crucial role in prosecuting perpetrators or freezing their channelled assets. How can financial institutions work with law enforcement to identify actionable intelligence, and identify and prosecute criminals? How can technology act as a catalyst in this process? With varying financial standards, what is the significance of normalising financial reporting and compliance to aid in the faster identification of criminals?

Attendee Insights:
A must-attend session to understand how the Financial Action Task Force (FATF) intends to strengthen its regulatory standards to mitigate risks linked to global financial crime, anti-money laundering, and counterterrorism financing.

Leadership panel | Strategic session | Theatre 1

Anti-Money Laundering: Critical Pathway for Sharing info: bolstering global anti-money laundering & counter terrorism financing capabilities

Global anti-money laundering regulations require financial institutions to monitor and report illicit transactions. Flagging illicit trades amongst the plethora of financial transactions requires sophisticated tools. But with financial reporting regulations varying across countries, law enforcement agencies are often at crossroads when it comes to cross-border information sharing. International data privacy and protection legislations further complicate the information-sharing processes instilling the importance of a standardised mechanism to share fraudulent financial trades amongst global law enforcement agencies in compliance with FATF regulations.

Attendee Insights:
Gain insights into various information-sharing practices and technology solutions adopted by global financial institutions and law enforcement agencies to track down illicit transactions tied to money laundering and terrorism financing.

Leadership panel | Strategic session | Theatre 1

Anonymity vs. Intelligence: tracing fraudulent cryptocurrency transactions

Blockchain technology had given rise to the widespread adoption of cryptocurrencies, thanks to its underlying architecture of security, anonymity, and transparency. Despite this, law enforcement agencies have been able to track down fraudulent financial transactions channelled through cryptocurrencies using sophisticated software that analyses the blockchain public ledger of all cryptocurrency transactions. As these technologies become widespread, how can law enforcement agencies, cryptocurrency exchanges, and financial institutions work together to amplify their skill sets, transform their tools, and address such crimes? What advances are expected in the coming years relating to crypto-tied assets?

Attendee Insights:
This session underlines how law enforcement agencies and financial institutions are leveraging forward-looking tools and augmenting their technological skillsets to track down illicit financial transactions channelled through cryptocurrencies.

Closing Remarks
WEDNESDAY 8 MARCH 2023

POLICE INNOVATION & RESILIENCE CONFERENCE

INNOVATION AND TECHNOLOGY TRACK

09.00 – 09.20  Keynote | Strategic session | Theatre 2
Presentation attacks, Morphing and Deepfakes: a new threat for identification technologies

Dr Sébastien Marcel
Head of Biometrics Security and Privacy Group
Idiap Research Institute Switzerland

09.20 – 10.00  Leadership Panel | Strategic session | Theatre 2
Proactive innovation-led approaches for change management in policing and law enforcement

Change is routine for police forces. As public institutions that heavily rely on technology to predict and prevent crime, it is equally critical for police and law enforcement agencies to perceive operational risks related to the adoption of technology solutions. With a plethora of sophisticated technologies available at their disposal, how are police forces managing change? What is the significance of identifying technology risks whilst implementing change processes? And how can police forces administer the development of technologies that are critical to enhancing public safety and security?

Attendee Insights:
This key session highlights how police forces are positively contributing to the success of technology transformation projects by embracing forward-looking change management processes.

10.00 – 10.40  Leadership Panel | Strategic session | Theatre 2
Police Innovation 2025: measuring the success of innovation and technology projects in policing and law enforcement

Intelligence and innovation are key to effective decision-making in policing and law enforcement fuelling organisational performance. Owing to changing crime forms and shifting societal dynamics, police forces are under pressure to innovate and improve their services to the public. How are global policing agencies driving innovation to make informed decisions and enhance public safety? What are the key milestones to be achieved when assessing the success of technology implementation?

Attendee Insights:
An important session for police leaders to fathom the critical pillars that will drive innovation and technology adoption across global policing agencies to counter evolving crime forms, enhance public safety, and gain community trust.

Dr. Sid Ahmed Benraouane
Innovation & Foresight Advisor
Dubai Police

Kris D’hoore, Chief Innovation Officer
Federal Police, Belgium

Anthony Mills, Executive Director, Global Innovation Institute (GInI)

10.40 – 11.00  Secrets of Innovative Success Workshop

Deborah Perry Piscione
Chief Strategy Officer
CoinHomes
### Leadership panel | Strategic Session | Theatre 3  
Policing in the age of metaverse: extended reality as an enabler of future community engagements, customer service, and police training

Metaverse has opened a whole new virtual world of unknowns for policing and law enforcement agencies. With the aim of creating virtual avatars that will enable easier interactions between people, industries have started diving into the world of extended realities. Though they’re in the nascent phase, it’s critical that such platforms are regulated today to remain prepared for the future. How can policing and law enforcement agencies monitor inappropriate behaviour in the metaverse? With cryptocurrencies becoming mainstream in the metaverse for financial transactions, how can law enforcement agencies track down illicit crypto assets? And how are policing and law enforcement agencies equally leveraging such platforms to enhance their relationships with communities and to augment the training capabilities of the force?

**Attendee Insights:**
An important session for attendees to gain insights on how the metaverse is becoming a critical topic of discussion today and how they will be used and monitored by policing and law enforcement agencies across a multitude of areas that are critical to public safety and security.

**Leadership interview | Strategic session | Theatre 3**

**Coordinated pathways to managing risks, emergencies, and organisational continuity across global police forces**

Risk management is crucial to emergency response and business continuity across all industry verticals. With changing crime forms and surmounting public unrest across global economies, what strategies can police forces adopt to manage risks and plan for business continuity during emergencies? How can police forces prepare and respond to service disruptions and what type of proactive frameworks must be put in place to assess such risks beforehand whilst maintaining higher levels of public safety and security?

**Attendee Insights:**
Gain insights into the role of risk management and business continuity planning across police forces and law enforcement agencies to navigate future emergencies.

14.30 – 15.00
**Keynote | Strategic session | Theatre 3**

**The Chaos Clock - How to recapture the time lost from events in the past**

Understanding the timing of events, existing and new technologies, and ways to enhance our capabilities to respond to and mitigate these types of events. Following these tragedies, Chris Grollnek has met with all levels of people either affected by or dedicated to stopping these types of events. Chris will discuss the Four “P’s” of an event and new technology, such as SWARM, to mitigate the threat by accelerating the response through intelligence-driven and collective data technology from the people inside an event.

**Chris Grollnek**
Owner, Active Shooter Prevention Project, LLC

15.00 – 15.20
**Keynote | Strategic session | Theatre 3**

**Resilience Roadmap – Making Our Future Cities More Resilient**

- Cross-stakeholder initiative for improving local resilience through advocacy, sharing knowledge, establishing mutually reinforcing city-to-city learning networks, injecting technical expertise, connecting multiple layers of government and building partnerships
- Developing and implementing local disaster risk reduction strategy for better future
- Building awareness among city stakeholders on City Resilience Program (CRP) services
- How can city stakeholders match their priorities with concessional financing and technical assistance support

**Sujit Kumar Mohanty**
Chief of Regional Office for Arab States, United Nations Office for Disaster Risk Reduction

15.20 – 15.40
**Keynote | Strategic session | Theatre 3**

**New Age Police: Accountability - Redundancies and Opportunities**
WEDNESDAY 8 MARCH 2023

POLICE INNOVATION & RESILIENCE CONFERENCE
LEADERSHIP AND OFFICER WELLBEING TRACK

09:00 – 09:15  Keynote | Strategic session | Theatre 3
Trust, fairness, and emotional intelligence: critical pillars to mentoring future police leaders

With several senior officers due for retirement in the coming years, choosing the next best officer to lead the force remains a challenge for global police forces. Policing multicultural societies demands emotional intelligence in leaders who can leverage this to identify the causes of crime, build trust with their subordinates and remain fair and transparent with the public about their operations. How can senior police executives identify and nurture future leaders? What key personality traits are essential to preparing police officers to adapt to future socio-economic conditions? How does emotional intelligence impact policing and how can it help increase team morale and gain public trust in policing?

Attendee Insights:
An important session to understand the significance of embodying emotional intelligence in policing operations and nurturing future leaders of the force.

09:20 – 10:00  Leadership panel | Strategic session | Theatre 3
Enhancing organisational happiness and productivity in police forces through agility, training, and motivation

Organisational happiness in police agencies is a critical factor driving community safety and security. In the wake of changing crime forms, police officers often must be prepared, both physically and mentally, to deal with challenging working conditions, often impacting their long-term well-being and productivity. What factors are critical to driving organisational happiness across policing and law enforcement agencies? What is the role of motivation, mindfulness, and emotional intelligence in policing and how does it affect the happiness of the force, and improve relationships with communities?

Attendee Insights:
This session identifies the critical strategies that must be adopted by police leaders to improve the happiness and wellbeing of their officers and to drive the continuous improvement of public safety and security.

09.40 – 10.10  Leadership panel | Strategic session | Theatre 3
Developing and enhancing comprehensive mental health programs for police officers

Police officers face a plethora of traumatic situations in their careers which have a wider impact on their overall health and wellbeing. Intense situations such as de-escalations often come with no warning making it challenging for officers to navigate their personal lives. What type of interventions are required to support front-line police officers to overcome trauma? How can teammates and families of police officers play a role in identifying and alleviating the effects of trauma?

Attendee Insights:
An important session that emphasizes the significance of addressing trauma management across all levels of policing and minimising the short and long-term effects on officer health and wellbeing.

09:20 – 10:00  Leadership panel | Strategic session | Theatre 3
Managing trauma in police and law enforcement: supporting officer wellbeing for organisational development

10.00 – 10.40  Leadership panel | Strategic session | Theatre 3
Developing and enhancing comprehensive mental health programs for police officers

10.40 – 11.10  Keynote | Strategic session | Theatre 3

WEDNESDAY 8 MARCH 2023

POLICE INNOVATION & RESILIENCE CONFERENCE
MOUNTED POLICE TRACK

11.30 – 12.30  Panel discussion | Strategic session | Theatre 3
The Role of Mounted Police in Police Work

- Achievements of Mounted Police
- The Role of Mounted Police in Community Policing.
14:00 – 14:15  
**Keynote | Strategic session | Theatre 3**  
Revamping leadership paradigms: challenges and opportunities facing women in policing and law enforcement

Global police forces and law enforcement agencies have serious underrepresentation of women. A key reason for this is the public perception of the challenges faced by women police officers in front-line operations and the resistance they often face as they progress to leadership roles, particularly from their peers. How has the role of women police officers evolved and what new challenges must they overcome? How are female officers opting for more field roles that involve active community engagement and how will this benefit and enhance the public’s trust in police agencies?

**Attendee Insights:**
Gain insights into the evolving role of female officers across frontline policing operations and the significance of adopting female-centric policies across global policing and law enforcement agencies and creating an equitable force.

Keechant L. Sewell,  
Police Commissioner,  
New York Police Department

14:20 – 15:05  
**Leadership panel | Strategic session | Theatre 3**  
Fostering gender equality in public security: Strategies to empower women across policing, law enforcement, and criminal justice

Owing to the serious underrepresentation of women, it’s vital for global police forces to employ and empower more female officers across all ranks and establish the agency’s approach to solving crime and augmenting its community relationships. What can police leaders do to remove the stereotypical perceptions against women police officers, both from within the force and from the public? How can policing and law enforcement agencies employ gender-inclusive strategies to promote existing female officers to senior ranks? What is the significance of mentoring and how can men act as champions of change to bridge the gender gap?

**Attendee Insights:**
This session underlines the strategies adopted by global police leaders to empower female officers into taking senior roles across policing operations and creating a positive impact on the communities they serve.

Kym Craven  
Executive Director  
National Association of Women Law Enforcement Executives (NAWLEE)

Maj. Anood Al Saadi  
President  
Dubai Police Women’s Council

15:10 – 15:55  
**Leadership panel | Strategic session | Theatre 3**  
Gender-supportive organisational frameworks to recruit and retain women in policing

Whilst most industry verticals have gradually shifted to hiring more women into their workforces, women still account for a nominal percentage across the public security sector. How are global police agencies setting the expectations while recruiting female officers? What policies and benefits are crucial to retaining women in the force? How are policing and law enforcement agencies working with academia to encourage and nurture future leaders through awareness programmes and internships?

**Attendee Insights:**
A key panel that sheds light on the programmes adopted by global police forces to recruit more women into the force, as well as the key strategies that play a critical role in ensuring women, are mentored and supported to grow up the ranks.

Ruby Flores  
Commander, Diversity, Equity and Inclusion Group

THURSDAY 9 MARCH 2023

ANTI-NARCOTICS CONFERENCE

09.45 – 10.30  
Keynote | Strategic session | Theatre 2
The science behind addiction: assessing the broader causes surrounding substance abuse and addiction

Continued substance abuse results in a significant shift in brain function that can lead to far-fetching health and social issues. Research institutions suggest the need to formulate the right mix of medication, counselling, and behavioural therapy to overcome compulsive substance abuse and addiction. How can governments, healthcare institutions, and law enforcement leverage scientific discoveries to frame tailored approaches to overcome drug addiction? What are the long-term impacts of addiction on brain function?

**Attendee Insights:**
A key session for attendees to gain insights on the scientific approaches to overcoming addiction and the importance of framing targeted methods to overcome the global drug issue.

Judith Grisel
Professor of Psychology
Bucknell University and International Author on drug addiction

09:50 – 10:35  
Leadership panel | Strategic session | Theatre 2
Cross-border drug data and intelligence frameworks: how are leaders leveraging next-generation technology to disrupt narcotics supply chains?

Drug markets have expanded to a worldwide customer base owing to dark web marketplaces that transcend border limitations. Factors such as anonymity further complicate the criminal identification process for law enforcement instilling the need to embrace modern technologies, such as artificial intelligence, to overcome digital barriers, identify cross-border drug networks, and spot critical nodes across the entire drug supply chain. What tools and policies are needed to help police and law enforcement agencies take on drug investigations on the dark web? How can international cooperation and intelligence sharing catalyse the disruption of drug supply channels?

**Attendee Insights:**
Gain insights into the role of technology in identifying cross-border narcotics supply chains and the importance of beefing up the technical capabilities of law enforcement and police forces to thwart such digital drug trade networks.

Tofiq Murshudlu
Head of Section
Deputy Border Control Branch United Nations Office on Drugs and Crime

10:40 – 11:25  
Leadership panel | Strategic session | Theatre 2
The public health approach to treating substance abuse and addiction: policy recommendations and standards to develop an addiction-immune population

Substance abuse has a profound long-term impact on the global healthcare system that involve serious medical conditions, particularly on the functioning of the brain. Despite the criminalization for the possession and use of narcotics, drug use has skyrocketed since the 1980s owing to drug markets on the web. The World Health Organisation has advised countries to adopt a public health approach to treating drug users and addicts to gradually reduce substance misuse and its related harms. But the question remains as to whether such policies will prove to be beneficial across all economies.

**Attendee Insights:**
A must-attend session to gain critical insights on the significance of framing multi-sectoral responses to the global drugs issue that addresses the biological, environmental, social, and psychological factors that influence substance abuse.

Dr. Ahmed Al-Shatti
President
National Awareness Project for Drug Prevention (Grass)
12.00 – 12.40  Leadership panel | Strategic session | Theatre 2
Impact of lifestyle changes on drug use and the role of supportive therapies to counter addiction

A multitude of lifestyle factors, both positive and negative, can influence a person’s desire to try out narcotics either for pleasure or for easing stress. Understanding the role of such lifestyle factors in the use of psychoactive substances through evidence-based interventions is crucial to police forces, law enforcement agencies, and public health institutions to bring about a substantial improvement in the recovery rates of addicts. How are government agencies adopting such programmes to support de-addiction and recovery? What is the role of police and drug enforcement agencies in identifying societal relationships and arrangements that lead to the use of psychotropics?

Attendee Insights:
This panel underlines the significance of lifestyle changes in identifying substance use patterns and the need to frame cognitive-behavioural therapies to promote and support recovery from addiction.

João Castel Branco Goulão
General Director
Intervention on Addictive Behaviours and Dependencies

12.40 – 13.30  Lunch

13.30 – 14.10  Leadership panel | Strategic session | Theatre 2
Future of psychotropic substances, addiction, and rehabilitation: expectations versus reality

The use of recreational drugs has skyrocketed in the past decades. Owing to the cheap manufacturing costs, new forms of synthetic psychotropic substances will become available in the market in the coming years accessible through illicit channels on the dark web. Though there has been a significant advance in our understanding of the science of addiction, particularly in the brain, new psychotropic substances will stagger the progress we have had so far. What strategies must public health agencies, police, and the law enforcement sector embrace to stay ahead of the curve and prepare for the emergence of new psychotropic substances? How will our approaches to addiction and rehabilitation change in the coming years?

Attendee Insights:
A must-attend session that sheds light on the new forms of psychotropic substances that are emerging across global economies and the immediate priorities that should be addressed to combat them.

14:50 – 15.05  Keynote| Strategic session | Theatre 2
The US experience in drug awareness and prevention in schools

15.05 – 15.20  Keynote| Strategic session | Theatre 2
The Dominican Experience (The Open Door) in Drug Awareness and Prevention
15.40 – 15.55  Leadership panel | Strategic session | Theatre 2
Comprehensive Addiction Treatment. Recovery for Life

In this innovative talk, Dr. Adams will discuss how individuals and their families may achieve “Recovery for Life” through comprehensive addiction treatment that includes addressing each patient from biological, psychological, social, and spiritual perspectives. The delivery of comprehensive treatment will be discussed through four clinical lenses including: (1) Substance use / compulsive behaviors; (2) Underlying Health and Mental Health issues; (3) Personality Development and Emotional Maturity; and (4) Family Systems. The discussion around family systems will include data from research examining outcomes for individuals that participated in the treatment of family member in treatment for Substance Use Disorder, including various benefits to participating family members and improved outcomes for the identified patients.

**Attendee Insights:**
1. To gain an understanding of how comprehensive addiction treatment can lead to successful outcomes for individuals and their family members including improved family relationships and mental health.
2. To identify and explore techniques and interventions that foster individual and family healing and effect positive change within the family system such as Residential Family Programming.
3. To discuss the lived experience of family members that have participated in the treatment of loved ones with substance use disorders, discuss treatment outcomes for family involved care, and to identify clinical and continuing care needs for individuals and their family members.

Dr. Phoenix Adams
EVP-Florida Programming,
Caron Treatment Centers

15.55 -16.10  Keynote| Strategic session | Theatre 2
The Role of Law Enforcement Officers/Police in Drug Prevention within Educational Settings (Schools and Universities)

Lt. Rudy Perez
President
National Association of School Resource Officers
**THURSDAY 9 MARCH 2023**

## K9 CONFERENCE

### 09:30 – 10.00
**Opening keynote | Strategic session | Theatre 2**

**Training Mindset: Street Vs Test**

Agencies and K-9 units tend to focus their training on the goal of passing a certification test. This type of mindset and training doesn’t translate to the real-world environments our K-9 units are put into daily.

**Attendee Insights:**
An important session for police forces to understand the significance of employing science-based techniques to train their K9 units and aid in the enhancement of their olfactory capabilities.

- **Eric Stanbro**
  Founder,
  VanEss K9 Academy

### 10.05 – 10.25
**Keynote | Strategic session | Theatre 2**

**Treating and Managing Working dogs in Hostile Environments**

- **Dr Jennifer Beck**
  Veterinary Surgeon
  MedVet

### 10.30 – 12.00
**Keynote | Strategic session | Theatre 2**

**Workshop - Digital evidence detection dogs – Operation and training**

History of digital evidence discipline
- UK project, results and cases Dog selec
- Kon and training plan
- Training modules for digital evidence dogs:
  - Reward development - building drive
  - Search development - increase motivation, intensity and precision
  - Indication training - building a solid and focused passive indication
  - Systematic search - building search patterns

- **Graham Attwood**
  Company Owner and Trainer,
  Precisionk9uk Limited

- **Tobias Gustavsson**
  Dog Trainer and Instructor,
  Canine Consulting by Tobias Gustavsson

### 12.00 – 12.30
**Keynote | Strategic session | Theatre 2**

**Canines: The Original Biosensors**

Biosensors are analytical devices that incorporates a biologically-derived method for chemical sensing by converting biological signals into measurable responses. Electronic noses or other mechanisms of artificial olfaction are often attractive as they are smaller, more affordable, easier to use, and have lesser consumables and power requirements than laboratory instrumentation. However, the canine olfactory system functions similarly to chemical sensors or vapor detection instrumentation and is frequently considered to be unmatched by machine.

- **Janet Cajigas**
  Chemistry PhD Candidate,
  Florida International University

### 12.30 – 13.00
**Keynote | Strategic session | Theatre 2**

**The Role of the Decoy**

- **Graeme Jones**
  Owner
  Cerberesk Working Dogs UK
The multipurpose canine: time-tested breed selection and training strategies for police forces

Dogs have been an integral part of public security for decades. Selecting the best dog breed is critical in determining their effectiveness and efficiency across working dog programmes. Owing to this, and due to the cost of recruiting a dog from another country, several police forces have begun implementing in-house breeding programmes for their K9 units. What hurdles can K9 units expect whilst sourcing dogs for their breeding programmes? How can the selection process be eased and what are the various approaches to improving the efficiency of breeding programmes enabling K9 units to have greater control over the dogs’ health, wellbeing, and characteristics?

Attendee Insights:
This panel highlights the novel strategies adopted by global police forces in their canine breeding programmes where they’ve relied on science-backed breed selection techniques.

14.30 – 15.15
Panel discussion | Strategic session | Theatre 1
The multipurpose canine: time-tested breed selection and training strategies for police forces
